Industrial Mechanic

Process Technicians

There are many options available to people who have maintenance and machine processing skills.

Few companies can provide an atmosphere and opportunities to grow both in skills and income.

Gain valuable experience in manufacturing jobs!

Process Technicians

(Starting @ \$18-20hr)

Production Processing is essential to maintaining the productivity of the plant. Process Techs are responsible for first piece quality and responsible for making "in-production" adjustments to the equipment.

1. Makes machine adjustments and minor repairs that result in high levels of product quality and output.
2. Responsible for machine changeovers based on standards and first part product quality.
3. Interacts with team members to identify and resolve machine performance and or product quality issues.
4. Performs routine inspections of machines and finished parts using rules, calipers, micrometers, and other measuring tools.
5. Identifies and implements process improvements that results in improved efficiencies, product quality and/or output.
6. Performs related machine preventive maintenance ensuring efficient machine operation.

Maintenance Mechanics

(Starting @ \$20-23hr)

Work assignments include machine repairs, fabrication, and troubleshooting. Maintenance applies both theory learned in school and actual experience to solve hydraulics, pneumatics and some electrical systems machine issues.

1. Install, sets-up, and perform maintenance on production machines with attention to safety protocols.
2. Performs mechanical and electrical repairs, fabrications and installation of equipment.
3. Uses test results, machine error messages, and information or feedback from others to diagnose and resolve equipment problems.
4. Reassembles, tests, and communicates work performed related to repairs, including the inspection and testing of repairs, while following housekeeping and safety protocols.
5. Uses testing devices to troubleshoot machinery and equipment in order to diagnose malfunctions.
6. Utilizes blueprints, manufacturers' manuals and process guides to determine correct installation and operation of machinery.

N.E.W. PLASTICS CORP.

We Are...

As a family owned business since 1968, N.E. W. Plastics Corp. has continued to provide nearly 200 people quality jobs in Northeastern Wisconsin.
